

Hampton Conservation Commission

May 22, 1978.

Our Chairman, Nelson Grant, opened the meeting at 8 0'clock, with Bill Barklay, Neil MacPherson, Ednapearl Parr, Irene Palmer and Ruth Nutter present.

The minutes of the April 24th meeting were read. Neil moved, seconded by Ednapearl, that the minutes be approved as read, vote -- unanimous.

Old business: The Treasurer reported his figures the same as the April meeting. Nelson read a letter from Peter Olney, which was given to the Secretary to keep with the Olney correspondence.

Ednapearl noted that Mr. Bosworth has a modified permit, from Mr. McGee's office. He will build a Duplex on a lot 78 ft. deep, 40 ft. wide, with a 30 ft. area deducted from this in front, for parking.

Nelson announced that the Seacoast Regional Conservation Commissions will hold a meeting at the Exeter Jr. High School library on Wednesday evening, May 24th, at 7:30. Hopefully, one of us can attend. Irene spoke of the Synercap Corp. on Towle Farm Road at Exeter Road, wondering how permits were issued on wetlands. She is hopeful that those at Synercap will leave the stream to flow

naturally into Batchelder's Pond, and that the trees will not be disturbed. She will speak to Building Inspector Medlock about the building going on at the Fresh Marshland on Exeter Road,

and the permits, and Bill will look over the area at Synercap. Ednapearl reported that all relatives had signed off on a quick claim deed on the marsh land that Gertrude Sherburne has given us, and

it will be properly recorded in Edith Holland's office.

This represents many hour's work, and necessary

"know how" in order to do it, that Ednapearl has put into this project. We are all grateful to her.

New business: Ednapearl made a motion that we get permission from Mr. McGee's office that he send some-

one from that office to check both the property at Towle Farm and Exeter Roads, and Brindamour's, off

Exeter Road. Ruth seconded this, and the vote was unanimous. Ednapearl attended a Quality Management

Workshop, New England Legislation on Water Pollution and Control, and brought each of us an educational

booklet on Four Keys to N. E. Water Quality. She said that no wetlands can be filled-- period-- for building

purposes. Bill wondered if our Commission had a map showing property that had been given to us, it's

location, etc., When the reply was negative, he said

he would contact Ruth Stimson. Bill next spoke of the Grist Mill on High Street, of the desirability of get-

ting 30 feet off the back to improve flood control and the spillway. Marion Mason owns land running from the

former Elizabeth Elwell Briggs home to and into Mill Pond, in the north west corner. Ruth volunteered to

call Marion, and see how she felt about giving 20 feet of this land, so that work could be done on the spill-

way. Ruth mentioned that a marker as a memorial to Anna Elwell might be suggested, as an incentive in

giving this bit of land.

Nelson had received several applications from Jane

Kelley at the Town Office, for dredge and fill, most of them reaching him too late for any action to

be taken on our part.

May 22-- Continued

The applicants follow:

- 1- Thomas Glavin
66 Island Path Storm damage
Date April 19 Date of hearing May 16
- 2- Hampton Water Works
Crossing Hampton Inlet near Rte. 1A with
water line
- 3-Smith and Gilmore
Rip Rap for storm damage and increasing
docking space up to 65 feet
- 4- Kenneth Traves
561 Ocean Boulevard
1400 cu. yds. fill for
42 apartments and 84 parking spaces 20#12
Hearing in Selectmen's room May 24
Hearing in Concord June 6

The members of this Commission will phone the members of the Planning Board before Wednesday evening, to say that we would appreciate their reaching an agreement against this petition. The Secretary will write to George McGee, stating that we feel very strongly against Mr. Trave's plans. A copy of this letter will be sent to the Planning Board before Wednesday evening, with a similar personal notation as our telephone message. Ednapearl also suggested that in the future when a letter was sent to Mr. McGee's office, a copy be sent to the Planning Board, which the Secretary duly noted.

Our next meeting will be on June 26.

This meeting was adjourned at ten o'clock.
